

İÇİNDEKİLER

Investigation the performance of 0-D and 3-d combustion simulation softwares for modelling HCCI engine with high air excess ratios	750-758
Gökhan Coşkun, Üsâme Demir	
Typical cracks in deck of ship-shaped structures and ways to modify and improve the design	759-768
Özgür Özgüç	
Evaluation of the instability problems in rock slopes surrounding historical Safranbolu by kinematic analysis	769-781
İnan Keskin	
CFD simulation of energy sources in EAF	782-791
Ekrem Büyükkaya	
A literature review on road surface marking materials and retroreflectivity properties	792-805
Metin Mutlu Aydın	
A review on effect of process parameters on weld features of copper and brass material in FSW and FSSW methods	806-815
Zafer Barlas	
Investigation of the soil characteristics for coastal zone land-use planning, Kandira, Izmit	816-823
T. Fikret Kurnaz	
Optimization of the cutting parameters effect to surface roughness with taguchi method in free form surface	824-830
Harun Yaka, Halil Demir, Arif Gök	
Structural damages of a model building due to destruction of an adjacent building and their influences on the performance levels	831-841
Turgay Çoşgun	
Effects of irregularities in reinforced concrete structures on building behaviors	842-850
Melike İlkhun	
Investigating the problems associated with interior air quality of bedrooms in boarding schools and developing a new system	851-859
Mustafa Ertürk	
Ensuring slope stability with piled retaining system	860-870
Ertan Bol, Aşkın Özocak, Sedat Sert	
The effects of waste biodiesel usage on engine performance and emissions at a single cylinder diesel engine	871-878
Mustafa Aydın, Mehmet Afşar, M. Bahattin Çelik	
Seebeck Coefficient of Ca _{2.8} Pr _{0.2} Co ₄ O ₉ Synthesized by Sol-Gel Method with Thermal and Structural Characterization	879-885
Enes Kılınç, Mücahit Abdullah Sarı, Fatih Uysal, Erdal Çelik, Hüseyin Kurt	
Effects of the semi die/plug angles on cold tube drawing with a fixed plug by FEM for AISI 1010 steel tube	886-892
Sadettin Orhan, Fahrettin Öztürk, Jabbar Gattmah	
Comparison of GFRP profile wear performance with classic concrete wear properties	893-898
Ferhat Aydın	
The comparison of the experimental and theoretical torsional moment results of reinforcement concrete beams	899-906
Abdulkadir Cuneyt Aydın, Barış Bayrak	
Analyzing the effects of biomass and coal ash for the dewatering properties of sewage sludge	907-914
Ömer Hulusi Dede, Derya Akbulut	
Hierarchical network model and SWOT analysis for a strategy selection problem in tourism sector with fuzzy data: case of Turkey	915-931
G.Nilay Yücenur	
The effects of different compression ratios and spark advances on the performance and emissions of a spark ignition engine with a new combustion chamber	932-942
Abdurrahman Demirci, Hüseyin Emre Doğan, Ömer Cihan, Osman Akın Kutlar, Rafiq Mehdiyev, Hikmet Arslan	

İÇİNDEKİLER

Investigation of minimization and reusability of the reject from electro dialysis processes: an example textile wastewater	943-950
Fatih İlhan	
A flow-focused facility layout application in food machine industry	951-960
Nevra Akbilek	
Tool life enhancement in cold bolt forging process: effect of forging stage design	961-967
Cenk Kılıçaslan, Umut İnce	
The effects of layer arrangements on fundamental frequency of layered beams in axial direction	968-977
Savaş Evran, Yasin Yılmaz	
Theoretical and experimental analysis of prestressed monotron type wire rope	978-989
Cihan Demir, Erkan Ala	
Xylem related p,p'-DDE uptake mechanism by cucurbita pepo spp pepo from contaminated soil	990-999
Mehmet İşleyen, Ahmet Aygün, Beytullah Eren	
The evolution of removal mechanism of chlortetracycline by nanoscale zero valent iron from aqueous solution	1000-1007
Hande Türk, Özge Hanay	
The use of life cycle analysis on the packaging waste management	1008-1017
Aliye Suna Erses Yay	
Ensuring the Safety of Karabük Industrial Zone Landslide	1018-1022
Aşkın Özocak, Sedat Sert, Ertan Bol	
Experimental and numerical investigation of pressure loss in a wall flow particulate filter	1023-1030
Vezir Ayhan, Yunus Özkan, İbrahim Özsert, İdris Cesur	
Performance comparison of different clustering methods for manufacturing cell formation	1031-1044
Sinem Büyüksaatçı Kiriş, Fatih Tüysüz	
Mechanical, physical and morphological properties of polypropylene/huntite composites	1045-1050
Yasin Kanbur, Ümit Tayfun	
Effect of drill geometry on hole quality and cutting performance	1051-1066
Mehtap Yavuz, Harun Gökçe, Çağlar Yavaş, İhsan Korkut, Ulvi Şeker	
Ergonomic analysis of assembly unit in a transformer company	1067-1080
Demet Gönen, Ali Oral, M. A. Beyazıt Ocaktan, Aslan Deniz Karaoğlan, Abdullah Cicibaş	
Numerical investigation of operating fluid, rotating disk speed effects and number of cavities on drag reduction of micro-textured surfaces for hydrodynamic lubrication	1081-1087
Ali Bahadır Olcay, Ahmet Çağrı Develi	
Comparison of properties of basic refractory bricks which use in rotary kiln of cement industry	1088-1094
Fatih Apaydın, Koray Kaya	
Carbon footprint studies on Esentepe Campus of Sakarya University, Turkey in 2015	1095-1099
Ratha Sreng, Mahnaz Gümrükçüoğlu Yiğit	
Systematic design and design thinking approach for conceptual design process: small household appliance design	1100-1109
Zeynep Parlar, Eray Kaan Soybora, Mustafa Sefa Burhan, Sena Davaslıgil	
Oxley modelleme yaklaşımının tahmin doğruluğu ve verimliliğinin artırılması	1110-1120
Mehmet Aydın
